**Comments:** *This is a camper really easy to drive. Theirs shape, very aerodynamic, make that have a high stability and a low consume of diesel. 8 litter each 100 kilometres (62, 14 miles) approximately, and with a very good price by day.*

*The camper has double bed in the back of the vehicle. Down the fixed double bed the customer have space for luggage, and with enough space for a bike if you take out one of the wheels. In this small vehicle you have all the comforts of a big model (shower with hot water, fridge and sink, air conditioned on cabin, and so on. The shower is really comfortable also in winter because it has a heating exit.*

*This group is perfect for a couple, or a couple with a baby, you can make a small bed in the dinning (for a baby until 4 years old).*

*You can turn the seat of the cabin in order to make the dinning for 4 persons.*

*Their manageability and price make one of the most demanding groups remembers make the reservation with enough time. If you are going to make a long travel, of prefer have more space (especially in the bathroom and the dinning), see our motorhome group B, C or D.*
